Entry Deadline: Midnight, April 8

All entries must be emailed to wfchallenge@vectorvest.com. You may enter one and only one candidate into the competition. Entries that are basically the same, but have different names, may be deemed to be the result of collaboration and redefined as one entry.

* Please include your full name and phone number as well as the name of your BackTest and indicate whether there is a custom Search and/or custom field in your Search.

Quick Poll

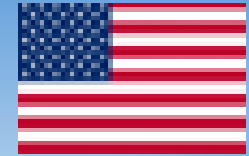

QUICKPOLL

Are we near a major market turning point?

Poll Results (single answer required):

Yes. I expect a mild pullback. MTI to 1.0.	36%
Yes. I expect a sharp pullback. MTI to 0.60.	15%
No. I expect the market will go mildly higher, with pauses.	25%
No. I expect the market to go sharply higher before falling.	1%
I just don't know.	22%

Handwritten red annotations: "51%" is written to the right of the first two rows, with a bracket grouping them. This indicates that 51% of respondents expect a pullback (mild or sharp).

Turning Point Essays

6/4/2004	<i>“THE PRIMARY WAVE”</i>
7/16/2004	<i>“IDENTIFYING MAJOR TURNING POINTS”</i>
7/23/2004	<i>“THE UNDERLYING TREND”</i>
8/13/2004	<i>“THE MARKET TIMING GRAPH”</i>
7/31/2015	<i>“THE INSIGHT OF CANDLESTICKS”</i>
8/7/2015	<i>“CANDLESTICKS MADE EASY”</i>
3/11/2016	<i>“LEADING INDICATORS”</i>

Dr. DiLiddo's Essay – March 11, 2016

LEADING INDICATORS.

The Primary Wave is the fastest trend indicator VectorVest has. It is driven by the 5-day performance of the Price of the VectorVest Composite, and signals an uptrend when the Price of the VVC is higher than its Close 5 days ago. Of course, it signals a downtrend when the Price on the VVC is lower than its Close 5 days ago.

The Primary Wave is an important indicator and plays an important role in the guidance provided by the Color Guard. It advocates that investors "Buy" or "Buy with Caution" when the Primary Wave is Up and "Not Buy" when the Primary Wave is Dn. Over the years, this has proven to be excellent guidance, but it is not fast enough for Aggressive Investors and Traders. They know the big money is made right at a reversal day, so they want to know what is going to happen tomorrow.

There is no way anyone can consistently predict the market, but they can get an indication of what it is likely to do the next day. One of the best ways to do this is to learn how to interpret leading indicators. Candlestick patterns provide one of the best methods of anticipating the next day's trading action.

Attend an Upcoming FREE VectorVest Webcast

Webcast Topic:

VectorVest Special ONLINE Forum

We invite you to come together the first Saturday of every month as we share member successes and ideas for profiting in the stock market using VectorVest.

Special guest **Dr. Barbara Star** will explain the popular Star Search trading system and how to profit from an additional aspect of it that has not yet been explored in VectorVest. The Star Search combines dual Detrended Price Oscillators (DPO) and Bollinger Bands in a way that helps investors identify price direction and the strength of that movement. In this presentation, Dr. Star will go beyond the original Star Search to show how the shorter DPO can be used to find earlier entries and continuation price moves.

As a Forum bonus, Dr. Star will also share one of her favorite chart reading methods for identifying price trends and demonstrate how it can be applied to short-term trading.
